About EyeClick

EyeClick, a leading company in interactive gaming for nearly two decades under the Blue-White umbrella, introduces EyeWiz, a groundbreaking system tailored for schools and kindergartens. This unique system integrates a projector with motion sensors, transforming every lesson into a dynamic and enriching learning experience.

EyeWiz boasts an extensive library of activities designed to accommodate diverse classrooms and align with various curricula across subjects.

Our platform offers regularly updated content, with the flexibility for customers to personalize and adjust materials to suit their needs. Leveraging artificial intelligence technology, EyeWiz simplifies the creation of creative and efficient learning activities.

The Interactive Library

Hundreds of pre-made templates and tons of content to explore and edit in an ever-expanding library developed under the guidance of teachers, child psychologists, and educational professionals.

Updated regularly with new content across various subjects and special occasions, such as holidays, trendy subjects, impactful news, etc. Users, including teachers and students, can also create and edit content themselves, with the added feature of using AI to facilitate rapid content creation.

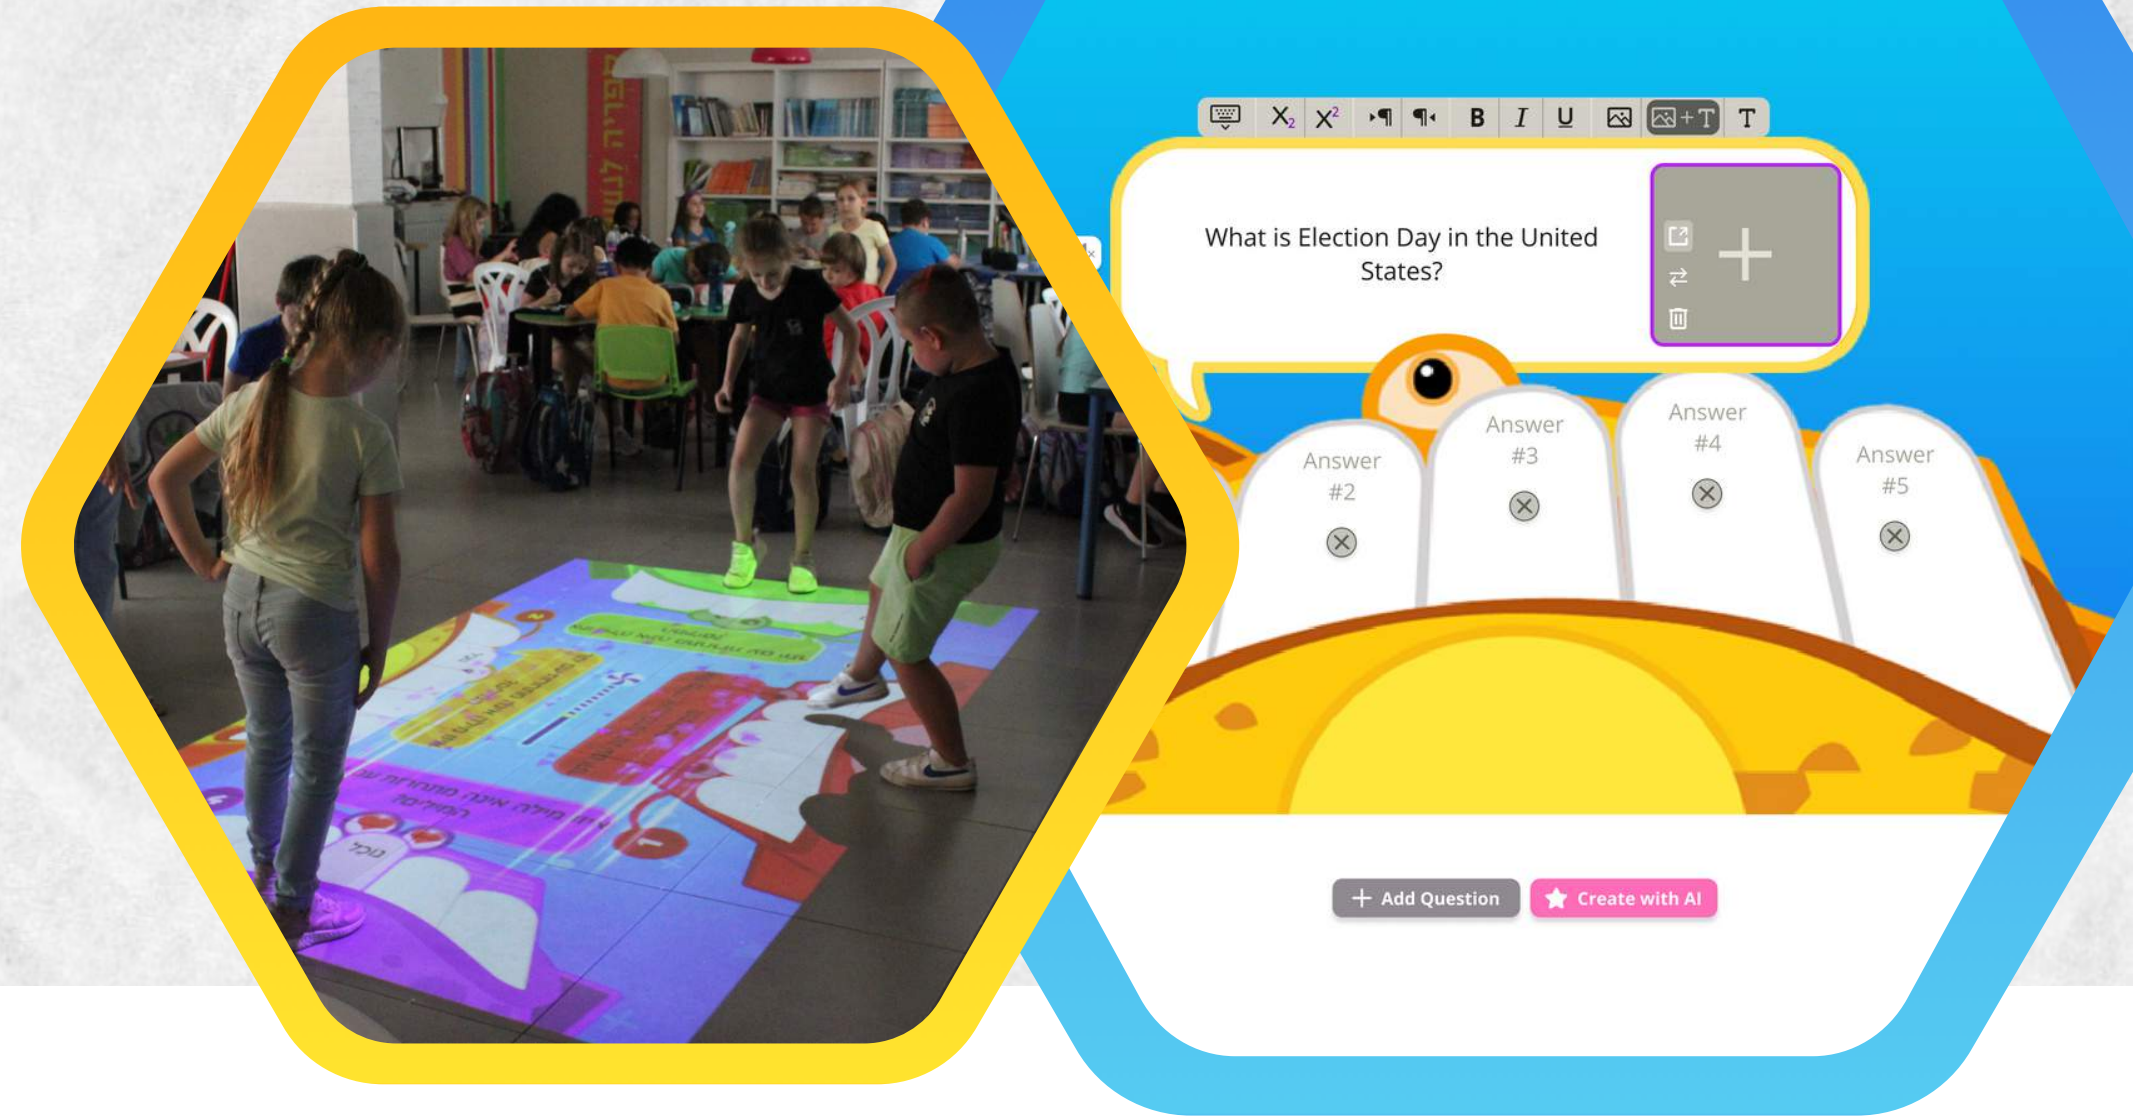

Subjects:

- Languages
- English
- Life Skills
- History
- Geography
- Math
- Sciences
- Art & Social Engagement
- Homeland & Citizenship
- Culture and Heritage

Custom Content Creator

EyeWiz's intuitive content management system, EyeWiz Hub, empowers users to effortlessly create, adapt, and share content. Its versatile game templates, customizable with lesson-relevant content, offer flexibility for various learning and evaluation stages.

Media Player

Use the power of artificial intelligence! Our user-friendly AI content creation will easily generate fascinating activities for you in any subject, and will open up a world of meaningful and fun interactive learning.

FLOOR

An innovative learning platform merges advanced motion sensor technology, engaging both body and mind in the learning journey. This active participation enhances knowledge retention and memory, while promoting motor skill development like balance and coordination. The enjoyable experience also alleviates tension and boosts motivation.

WALL

Transform any wall into a large touch screen, offering engaging educational content and converting traditional lessons into innovative, experiential ones. This interactive wall fosters active, creative learning and teamwork, revolutionizing the learning experience and enhancing academic achievements.

TABLE

Our innovative giant tablet transforms any table into an interactive learning hub. With its large touch screen, learners explore and collaborate on fascinating educational content, fostering focused learning and discipline. This fun and effective tool enhances social interaction, teamwork, and technological skills among students.

SAND TABLE

Introducing the Interactive Sand Table: a sensory learning marvel blending traditional sandbox charm with cutting-edge touch screen technology. Encouraging exploration through sight, hearing, and touch, this product creates an enriching, imaginative learning environment, sparking excitement and intuitive discovery.

Our Interactive Projectors

BEAM PRO

Ceiling projector, perfect for large or bright rooms

- Laser projector, without a lamp!
- Hundreds of interactive activities

BEAM MOBILE

Portable projector

- Created to move easily between rooms and different locations
- Hundreds of interactive activities

OBIE

Ceiling projector, perfect for small or medium rooms

- Modern design, lightweight and super thin
- Hundreds of interactive activities

SAND TABLE

mobile table

- Created to easily move between rooms and different locations
- Hundreds of interactive activities

**Meredith Tritico,
Kids R Kids**

"The games are excellent, the content is varied and I was able to find suitable activities for every child who came to study in the space, at every learning level."

**Lisa Nevit,
Library of Georgia**

"A powerful educational and physical tool that promotes teamwork, motor skills and above all, motivation and enjoyment in learning."
